## ABOUT THE ANNUAL GROWTH PROFILE

As in previous years, the Annual Growth Profile is being produced and distributed in digital form. Digital distribution facilitates efficient and cost-effective sharing and use of the document as well as the many high-resolution images located herein.

The Annual Growth Profile is organized into sections defining six growth measures: Population and Housing, Construction, Zoning, Platting, Land Use, and Transportation. Informational graphic and maps have also been included in each of these sections so as to provide detailed locational information regarding growth and development trends throughout the City. A planning sector map has been included for reference.

## POPULATION AND HOUSING

Changes and trends in City population and housing totals are detailed in this section. Historic tallies are provided to facilitate understanding of City demographic trends within today's development context. Current housing and population estimates, analysis of growth trends, and planning sector densities are also detailed.

## CONSTRUCTION

In this section, investigation of building permit data yields detailed descriptions of new residential and non-residential construction trends for planning sectors and the City as a whole. Maps and graphics detail the location of new construction activity and relative numbers.

## ZONING

Current zoning conditions as well as a calendar-year (2013) breakdown of zoning activities are included. Additionally, maps illustrating existing zoning and zoning activity are provided.

## PLATTING

As platting activity is a gauge of future development activity, this section records the number and location of new lots through use of final plats, combination plats, and minor plats over a five year timeframe. Moreover, replatting, in existing areas, is also included in the analysis so as to accurately define redevelopment activity. Plats filed in 2013 are indicated in section graphics.

## LAND USE

Arlington's generalized land use is discussed in this section as well as its relation to national land use trends and averages.

## TRANSPORTATION

Vehicular and air traffic is discussed in the Transportation section. Here vehicular traffic is assessed utilizing average daily traffic (ADT) measures by City road segment. Airport activity and current improvement projects are summarized.

## SUMMARY OF FINDINGS

### POPULATION AND HOUSING

As estimated by the City's Community Development and Planning Department, the 2012 total estimated population for the City was 367,137 residents. During 2013, Arlington's population grew by approximately 0.1 percent to an estimated total of 368,644 residents and 145,886 housing units. The majority of this growth occurred south of Interstate 20, and north of Interstate 30.

### CONSTRUCTION

The total number of permits issued in 2013 was 5,399, dropping from last year's total by approximately 12 percent. Likewise, the total value of building permits dropped in 2013 by four percent.

### ZONING

Just over 54 percent of the land in Arlington was zoned for residential uses and low density residential comprised the majority of this share. During 2013, there were 45 requests for zoning changes or development plan/concept brief approval, 12 requests for administrative revisions, 11 requests for Specific Use Permits, and six requests for Substitute Landscape Plans. These requests totaled 1,280 acres, a significant decrease from 2012

totals. The number of total cases also increased from 53 to 62. Of the 62 total requests, 40 cases were approved.

### PLATTING

Plats filed in 2013 created 737 lots, an increase of 111 percent over 2012. This increase in lots is largely due to the filing of the Viridian Village Phases 1B and 1C2 with 236 and 211 lots respectively, and Eden Glen Estates which entailed the creation of 102 lots. Total platted acreage garnered an increase of 2 percent, from 352 acres in 2012 to 359 acres in 2013.

### LAND USE

Arlington's developed areas remained dominated by residential uses which comprised approximately 48 percent of all land use types within the City. Vacant-Developable land occupied the second largest land use in the City comprising roughly 12 percent of Arlington's total land uses.

### TRANSPORTATION

The most traveled road segment in 2013 (of those counted) was South Cooper Street between Wimbledon Road and Oak Village Boulevard. The remaining top traveled segments were along South Cooper Street (between Wimbledon and Oak Village), Matlock Road, and East Pioneer Parkway.

The number of operations (takeoffs and landings) at the airport saw an eight percent annual increase in 2013. This rise in airport operations was partially due to a regional economic recovery as well as a new 4,900 ft. west parallel taxiway completed in 2012.

## HISTORIC TRENDS

### POPULATION

From the City's founding through the Great Depression and World War II, population growth was slow but steady. The surging post-war economy, as well as Arlington's location between the rapidly expanding cities of Dallas and Fort Worth, contributed to a dramatic population increase.

This post-war boom resulted in a city that was six times larger in population by 1960 than it was in 1950, climbing from 7,692 to 44,775 people. During the decades that followed, several factors facilitated the continued growth of the City. The large-scale annexation of developable land (averaging nearly 15,000 acres per decade from 1950 to 1990), the opening of Interstate 20 and Dallas/Fort Worth International Airport in the mid-1970s, and a strong regional economy all contributed to a peak in population increase during the 1980s, when Arlington added 101,000 new residents. By 2010, the population was more than 47 times greater than it was in 1950.

## HOUSING

During the decade from 2000 to 2010, the number of total housing units in Arlington grew by 9.5 percent – rising from 132,203 to 144,805 total units. This housing unit growth rate is smaller than the one experienced during the 1990s, which was 16.3 percent. The geographic focus of residential development for the most recent decade was south of Interstate 20, with 65 percent (11,000+ units) of construction totals. Residential construction trends have favored single family development over multi-family development during the past several years. Between 2000 and 2010, the share of single family housing units in Arlington increased compared to multi-family totals. Year-end 2000 housing estimates indicated

### DECENNIAL POPULATION GROWTH BY PLANNING SECTOR, 1990 - 2010

Year	Central	East	North	Southeast	Southwest	West	Citywide
1990	9,859	30,859	21,140	9,943	12,745	29,087	113,636
2000	10,263	32,470	23,146	18,020	16,666	31,638	132,203
2010	9,869	32,900	22,799	26,955	19,072	32,920	144,805

Source: City of Arlington, Community Development and Planning

a housing mix of 62.5 percent single family and 37.5 percent multi-family housing units. By 2010, the housing distribution had shifted to 68.8 percent single family, 31.1 percent multi-family housing units, and 0.1 percent considered other units (boats, or RVs).

### CURRENT CONDITIONS

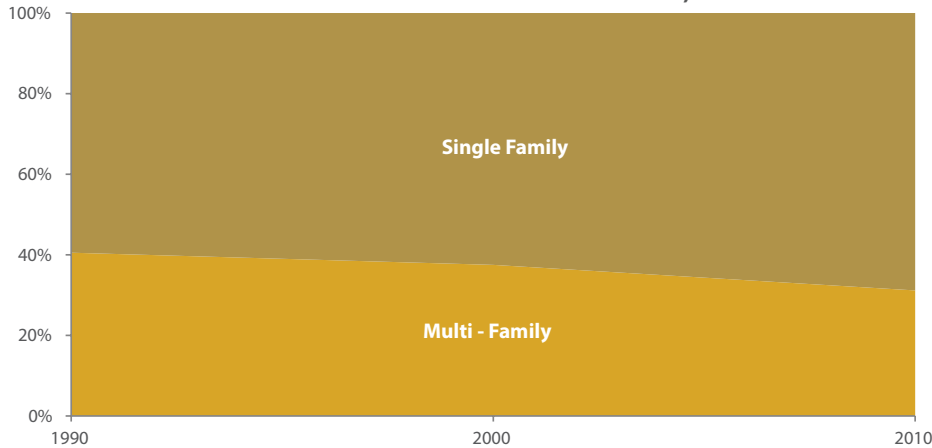

During 2013, the City of Arlington added an estimated 1,507 residents and 543 housing units, representing a 0.4 percent

gain in population and a 0.4 percent gain in housing units from the end of 2012.

The City’s population was estimated at 368,644 at the end of 2013, a gain of less than 1 percent. Population growth during 2013 was concentrated in the North and Southeast Sectors of the City. Collectively, these areas added 988 new residents during the year, and witnessed population growth rates of 1.2 and 0.6 percent respectively. Population growth occurred throughout the City.

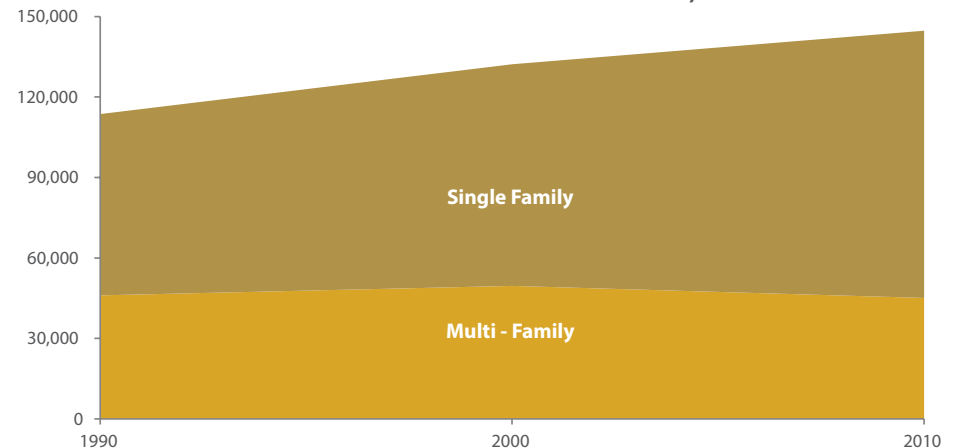

The City’s total population distribution remains consistent with 2012 sector allocations as no Sector demonstrated any significant change. The East and Southeast sectors continue to account for approximately 48 percent of the City’s total population. Although 36 new multi-family units were constructed in 2013, single family unit construction dominated city-wide growth in 2013. At the end of 2013, single family homes comprised approximately 69 percent (100,841

HOUSING MIX, 1990 - 2010

Source: City of Arlington, Community Development and Planning

TOTAL HOUSING UNITS, 1990 - 2010

Source: City of Arlington, Community Development and Planning

units) of the City’s total housing stock while multi-family represented the remaining 31 percent (44,952 units).

The number of single family housing units heavily outweighed the number of multi-family units in the Southeast, Southwest, and West Sectors in 2013. The housing mix was more evenly distributed in the Central and East Sectors with approximately 49 percent and 58 percent, respectively, of the total sector dwelling units being single family. The North Sector had the greatest proportion of multi-family units, with just over 67 percent. It also had the largest number of multi-family units (15,367). The second largest number of multi-family units was found in the East Sector (13,985). These two sectors accounted for almost two-thirds (65 percent) of the City’s multi-family housing stock

in 2013, while maintaining just 38 percent of the City’s total housing stock.

The impact that continued housing and population growth have on the City’s density cannot be overstated. As the population of the City grows, the ratio of residentially developed acreage relative to the number of people living in the city will decrease. In 2013, the average number of housing units per acre of residentially developed land remained at approximately six units. This number remains unchanged from that of 2012.

## HISTORIC TRENDS

An analysis of development trends for the City of Arlington over the past 30 years reveals significant fluctuation in terms of total building permits issued. These fluctuations tend to mirror the overall health of the regional, state, and national economies. For example, the booming 80s demonstrate a significant up-tick in building permit totals, while the recession of the early 90s can be seen in significantly decreased numbers. Building permit totals began to recover in the mid-90s only to again dip to their lowest point in 2009 during the Great Recession of the latter decade. As the economy recovered, so too did the recovery for building permits which reached a 7-year high (6,146 permits) in 2012.

Likewise, development activity within the City of Arlington throughout 2013 demonstrated continued growth, albeit at a slightly slower rate as the City issued a total of 5,399 building permits for that year.

TOTAL NUMBER OF ISSUED PERMITS BY YEAR, 1983 - 2013

Source: City of Arlington, Community Development and Planning

ANNUAL RATE OF CHANGE FOR TOTAL PERMITS ISSUES, 1983 - 2013

## TOTAL PERMITTING ACTIVITY

Total building permit activity declined approximately 12 percent between 2012 (6,146 permits) and 2013 (5,399 permits). Permitting by category, residential vs. non-residential permits, also fell between 2012 and 2013 by 17 percent (736 permits) and one percent (11 permits) respectively. The decline in residential permits reflects a cautious recovery for the housing market in post-recession Arlington. Residential permits represent approximately 68 percent of the total number of building permits in 2013.

The number of permits granted provides only a partial indicator of development health. Permit valuation details the potential economic impact of the new structure. The total value of building permits in 2013 was in excess of \$323 million, and representing a decrease of approximately four percent over 2012. The overall loss in permit development valuation reflects the 3.3 percent decrease in non-residential permits, although there was a slight increase (8 percent) in residential permits.

The continued growth for non-residential building permits included two school projects (valued at \$16M – North Sector, and \$7.7M – Southeast Sector). Likewise, additional high value projects included

several retail and warehouse structures as well as banks, restaurants, and a broad range of several significant projects.

## TOTAL PERMITS ISSUED BY CATEGORY, 2009 - 2013

## TOTAL VALUE OF PERMITS ISSUED BY CATEGORY, 2009 - 2013

Source: City of Arlington, Community Development and Planning

## RESIDENTIAL NEW-CONSTRUCTION

Residential new construction permits comprised approximately ten percent of the total permits issued in 2013. The total number of residential new construction increased modestly (approximately 17 percent) over the previous year's total, growing from 456 total residential permits to 535 permits. Only single-family residential new construction permits were filed in 2013.

Residential building activity remained high for the North Sector of the City in 2013 where over one-third (184 permits) of the single family new construction permits were located. Likewise, the Southeast Sector of Arlington posted

high residential permit activity for the second year in a row drawing roughly one-third of all residential permits issued while the Southwest Sector garnered 20 percent (105) of the total for that year.

On average, the value of a new single family construction permit in 2013 was \$206,280, an increase of \$16,874 (9 percent) over the previous year's average permit value.

### SHARE OF RESIDENTIAL NEW CONSTRUCTION PERMITS BY PLANNING SECTOR, 2013

## NON-RESIDENTIAL NEW CONSTRUCTION

Non-residential new construction activity totaled approximately \$62 million in 2012, but dropped considerably to an annual total of roughly \$23.5 million in 2013 – a decrease of approximately 62 percent. The distribution of non-residential new construction varied among the City’s Planning Sectors in 2013 with the East Sector of the City accumulating roughly 37 percent (35 permits) of all non-residential permits issued. The Southeast, West, and North reported modest activity with 18, 17, 14 percent (17, 16, and 14 permits) respectively. Although permit activity remained relatively high in the East Sector of the City, the average value per permit was

actually highest in the Central Sector at \$347,513. Average permit values among the remaining sectors remained somewhat similar with the exception of the North Sector which reported the lowest average permit value of roughly \$127,000.

SHARE OF NON-RESIDENTIAL NEW CONSTRUCTION PERMITS BY SECTOR, 2013

## CURRENT CONDITIONS

Over 54 percent of the land in Arlington was zoned for residential use in 2013, with Single Family districts comprising the vast majority (50 percent) of the total zoned area. Multi-Family districts comprised the remaining four percent. The West Sector retained the highest proportion of Single Family acreage for any sector in the City with nearly 73 percent zoned in kind.

Following Single Family, Industrial districts (including Light Industrial and Industrial Manufacturing), and Planned Development (PD) district account for the second highest percentage of zoned acreage within the City. Of the two district groups, PD garnered approximately 13 percent of all total zoned acreage within the City while the combined industrial districts (IM and LI) comprised roughly 12 percent. It should be noted that land zoned as PD allows for both residential and non-residential uses.

Approximately 26 percent of the City's industrially zoned land remained located in the East Sector of the City (which, as the third largest sector in the City, represents a 20 percent share of the City's total land area). This reflects the concentration of manufacturing and warehouse development associated with the Great Southwest Industrial

District and the General Motors plant. Commercial zoning districts followed the residential and industrial zoning district groups in terms of the total zoned acreage within the City of Arlington accounting for an overall share of approximately 8.5 percent.

The City's total amount of agriculturally zoned land decreased slightly from 4,312 acres in 2012 to 4,275 acres in 2013.

Likewise, the share of agriculturally zoned areas relative to the City as a whole decreased from 8.5 percent to 8 percent. Approximately 70 percent of the City's agriculturally zoned land remains located south of Interstate 20 in the Southeast and Southwest sectors of the City.

SHARE OF LAND BY ZONING CATEGORY, 2013

Source: City of Arlington, Community Development and Planning

## VACANT LAND

Vacant developable parcels account for 6,098 acres of zoned land in Arlington. Of these parcels, 1,047 acres remained located within residential zoning districts. Agriculturally zoned land, which can accommodate residential development, included an additional 16 percent (971 acres) of Arlington's total vacant land in 2013.

Looking more closely at general zoning categories, 23 percent of the land zoned for Agriculture uses remained vacant. Historically, land is zoned Agriculture upon annexation to the City, and is typically rezoned as it develops. The largest single section of vacant land in the City is zoned Agricultural.

Nearly 22 percent of the land zoned for Planned Development was not yet developed in 2013, a nearly 41 percent decrease over 2012. This decrease was likely due to the completion of construction in areas previously zoned for, not yet developed.

## ZONING ACTIVITY

In 2013, 62 requests totaling approximately 1,280 acres were received for zoning changes, development plans, specific use permits, and substitute landscape plans.

Forty-five requests (1,193 acres) for zoning changes, development plans or concept briefs were submitted for consideration to the Planning and Zoning Commission and City Council. Twelve requests for administrative revisions to existing Planned Developments were also submitted. This represents a significant drop from 2012 in which 28 such requests were submitted. There were also 11 requests (approximately 71 acres) for Specific Use Permits (SUPs) submitted during 2013. Although the overall number of SUP submissions to the City dropped by 8 percent in 2013, the overall

 Note: In June 2014, the Zoning Districts detailed in this AGP were changed with adoption of a new Unified Development Code (UCD). Subsequent AGPs will reflect this change.

acreage associated with SUP submissions rose 33 percent over 2012 (53 acres).

In 2013, six requests for a Substitute Landscape Plan (SLP) were made to the City of Arlington representing 16 acres. This constitutes a 50 percent increase in both the number of SLP requests, and associated acreage (eight acres) from the previous year. Of the 62 total requests for zoning changes, development plans, concept briefs, SUPs, and SLPs:

- 40 cases were approved;
- 4 cases were withdrawn;
- 5 cases were still under review;
- 6 case was still awaiting P&Z;
- 1 case was continued by P&Z;
- 1 case was awaiting Council approval;
- 1 case was administratively withdrawn;
- 4 cases were denied.

There were three requests for changes from non-residential to residential zoning districts, none of which was denied. In 2013, requests for residential rezoning totaled approximately 37 acres.

## RELATED ACTIVITY

Fifteen gas well permits were issued in 2013; a significant reduction from 2012 totals (31 permits).

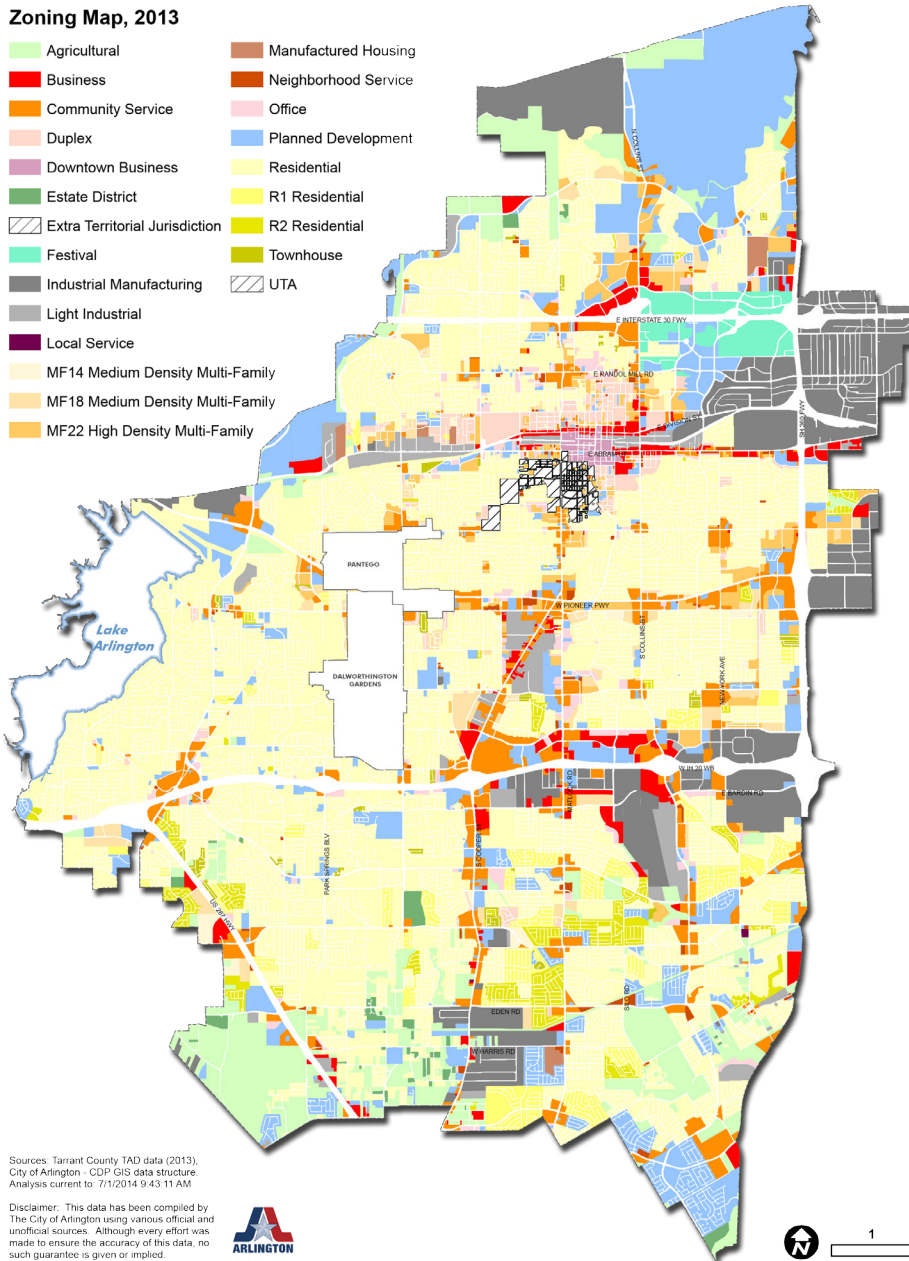

## SHARE OF LAND BY ZONING CATEGORY AND PLANNING SECTOR, 2013

## HISTORIC TRENDS

Registered plats provide another indicator of development activity within the City, as tracts of land are subdivided or combined to accommodate new growth and a changing economic landscape. The incorporation of final, minor, and combination plats create new lots within the City.

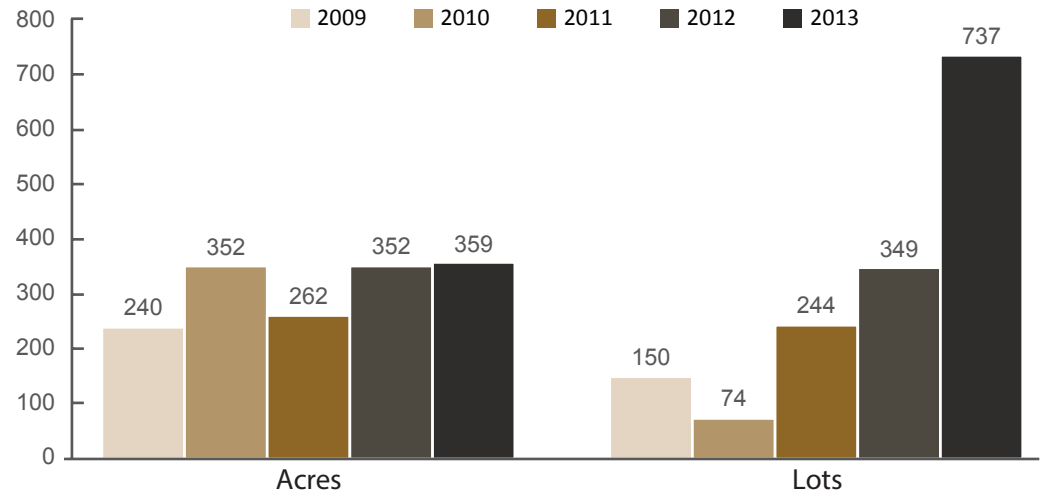

Post-recession Arlington is demonstrating a steady development trend, averaging just over 32 cases per year since 2009. Continuing a five-year trend, replats comprised the majority of platting cases filed with the City in 2013; however, such activity remains indicative of a stable community nearing build-out.

## CURRENT CONDITIONS

Since 2012, the number of lots created more than doubled increasing by approximately 111 percent. The number of acres platted also increased, albeit only slightly, by roughly two percent. Two development efforts in 2013 comprise the majority of new lots created in 2013: Viridian Village Phases 1B and 1C2 with 236 and 211 lots respectively, and Eden Glen Estates which entailed the creation of 102 lots.

Plats filed in 2013 included 737 lots on approximately 359 acres. Aided by the development of Viridian Village and Eden Glen Estates, the North and Southeast Sectors of the City provided the largest shares of plats in 2013 with each contributing roughly 30 percent of the annual total.

## LAND USE CHARACTERISTICS

Arlington encompasses 99.72 square miles or roughly 64,000 acres. As of 2013, approximately 43,118 acres of the City were developed as well as an additional 10,965 acres for roadways and transportation facilities. Just under 15 percent of the remaining City acreage is categorized as Vacant, however only 12.1 percent of the land is also developable.

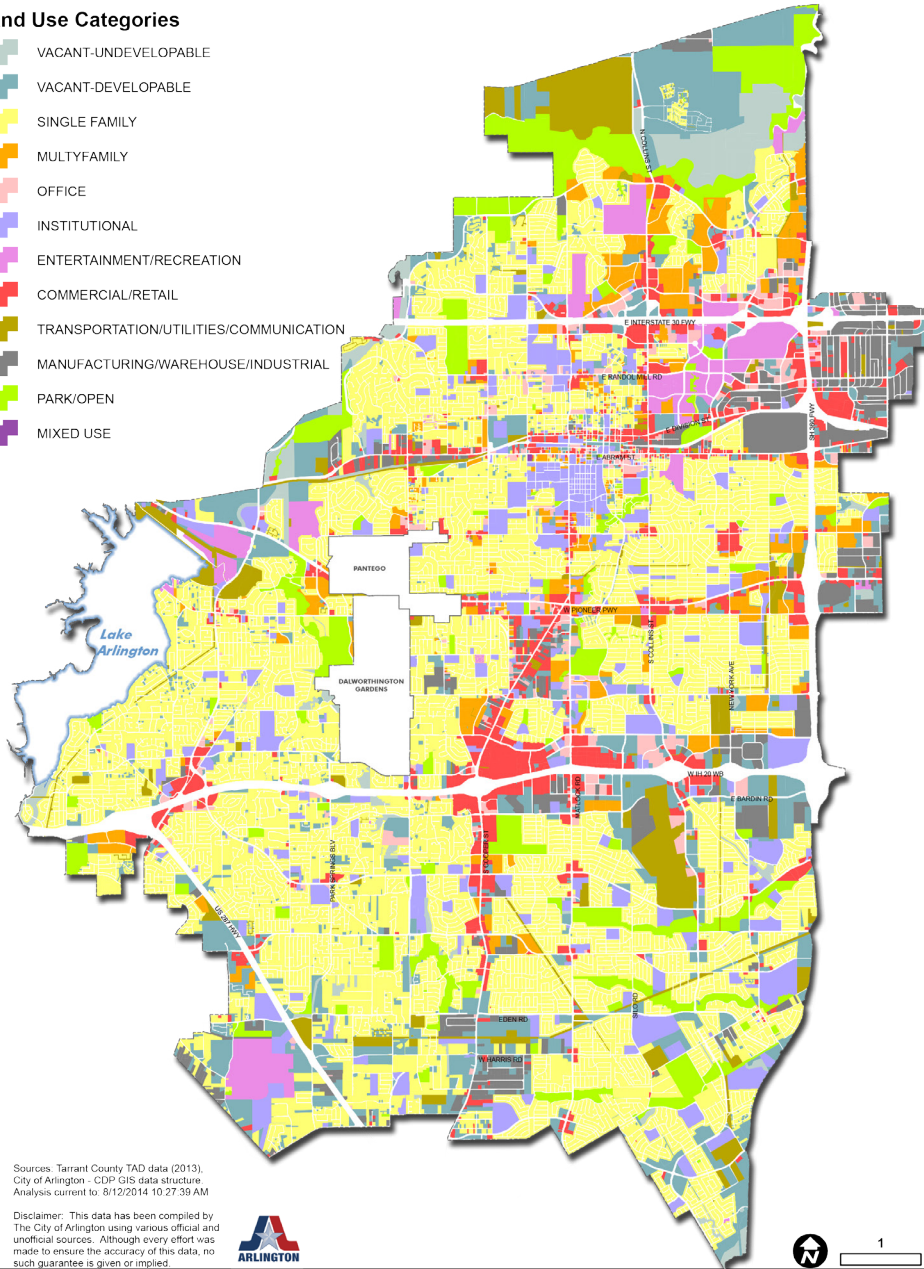

## LAND USE CHARACTERISTICS, 2013

Land Use Categories	Area (acres)	Percent
Vacant - Undevelopable	1,444.3	2.85%
Vacant - Developable	6,120.1	12.08%

## GENERAL LAND USE

The largest portion of Arlington’s land area was devoted to Single Family land use in 2013 with over 43 percent located south of Interstate 20. Land devoted to Multi-Family uses was concentrated primarily in the North and East Sectors. The East Sector also contained the largest share of the City’s Manufacturing/Warehouse/Industrial

and Commercial/Retail uses at 56.3 percent and 39.2 percent, respectively. and two golf courses (Lake Arlington and Shady Valley) in West Arlington.

Other significant concentrations of use, specifically Parks/Open space occur in the North, Southeast and West sectors. This reflects the location of River Legacy Park in North Arlington, the linear park system and Harold Patterson Sports Center in Southeast Arlington,

## LAND USE BY SECTOR, 2013

Land Use Categories	North	West	Central	East	Southwest	Southeast	Total
Vacant - Undevelopable	771	374	4	50	124	122	1,445

## ROAD TRAFFIC

City wide growth yield increased traffic volumes on many of Arlington's major thoroughfares as well as local area streets. It is therefore important to define those road segments that carry the bulk of local volume. The map on the following page details vehicle counts along street segments during a metered 24-hour period.

The Department of Public Works and Transportation counts traffic on Arlington streets at individual road segments using mechanical counters. Every effort is made to keep data current on road volumes, but every street is not visited every year, and different areas of the City are measured at different times throughout the year.

Of the road segments counted in 2013, the most traveled South Cooper Street between Wimbledon Drive and Oak Village Boulevard. This particular segment of South Cooper Street was not among the ten most traveled thoroughfare segments in 2012.

On average, traffic volume decreased by approximately 20% percent for the City's top ten most traveled road segments in 2013. Moreover, traffic volume decreased substantially for thoroughfare segments that ranked within the City's

ten most traveled roads. For example, Matlock Road between Stephens Street and Interstate 20 decreased by roughly 19 percent. Likewise, South Cooper Street between Station Drive and Colorado Lane decreased by 22 percent while Matlock Road between Green Oaks Boulevard and Cornfield Drive dropped by 31 percent over the previous year. In contrast, traffic volume along East Pioneer Parkway between Willow Point Drive and Elm Point Drive increased by approximately 19 percent.

## TOP TEN ROAD SEGMENTS BY TRAFFIC VOLUME, 2013

Rank	Route	From	To	Count
1	Cooper	Wimbledon	Oak Village	78,150
2	Cooper	Colorado	Secretary	69,339
3	Cooper	Station	Colorado	66,411
4	Pioneer	Willow Point	Elm Point	64,225
5	Cooper	Nathan Lowe	Green Oaks	61,666
6	Matlock	Stephens	Interstate 20	56,209
7	Cooper	Eden	Hardisty	51,182
8	Cooper	Inwood	Lynda	50,740
9	Matlock	Interstate 20	Highlander	50,540
10	Matlock	Green Oaks	Cornfield	50,271

Source: City of Arlington, Community Development and Planning

Note: All traffic counts are one-time, two-way only traffic counts for a 24-hour period excluding weekends. Traffic on all road segments is not necessarily counted every year.

## TOP TEN ROAD SEGMENTS BY TRAFFIC VOLUME, 2012

Rank	Route	From	To	Count
1	Cooper	New Center	W Bardin	105,458
2	Cooper	W Arbrook	W Pleasant Forest	98,423
3	Cooper	Station	Colorado	85,620
4	Matlock	Interstate 20	Highlander	77,378

Note: All traffic counts are one-time, two-way only traffic counts for a 24-hour period excluding weekends. Traffic on all road segments is not necessarily counted every year.

## AIRPORT ACTIVITY

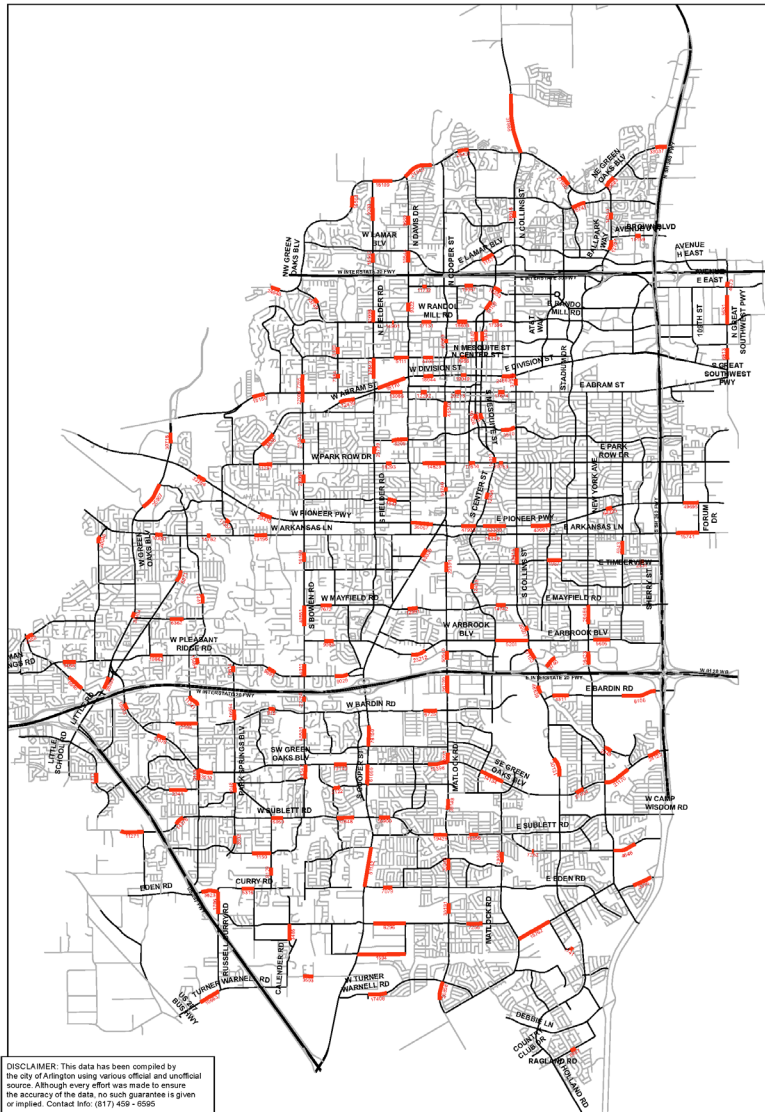

The Arlington Municipal Airport occupies approximately 500 acres between Interstate 20 and Southeast Green Oaks Boulevard along South Collins Street. Since 1986, nearly \$75 million has been invested in the infrastructure on the airport. The Federal Aviation Administration (FAA) has designated Arlington Municipal as a “reliever” airport, a larger general aviation facility that relieves corporate,

cargo, and general aviation traffic from commercial service airports such as Dallas-Fort Worth and Love Field airports.

The airport is strategically located in a competitive market, and trends in the number of aircraft operations have reflected the national economic climate. Aircraft operations had been steadily rising from 2002 through 2008. The recession in 2009 negatively affected corporate travel and flight school operations. From 2009-2012, one air charter company and two flight schools closed. However, the

## AIRPORT OPERATIONS 2000 - 2013

Year	Number of Operations	Percent Change from Prior Year
2000	142,870	4.10%
2001	133,336	-6.67%
2002	132,403	-0.70%
2003	137,800	4.08%
2004	140,800	2.18%
2005	141,200	0.28%
2006	147,700	4.60%
2007	153,413	3.87%
2008	134,599	-12.26%
2009	87,619	-34.90%
2010	80,433	-8.20%
2011	77,911	-3.14%
2012	70,554	-9.44%
2013	76,117	7.88%

### Traffic Count - 2013

Date: 5/24/2014  
 Path: X:\Information Services\ Pavement\TRAFFIC COUNTS\2013\2013 Traffic Count.mxd

decline in aircraft operations is not reflective of the Airport's general level of economic activity. The trend is now toward more itinerant (visiting airport) operations, with more transient aircraft (especially corporate jets). Jet operations have risen 21 percent over 2012, as the Airport sees growth in its corporate and cargo business segments.

Several key improvements have enhanced aircraft safety and bolstered the economic development potential of the airport. The Air Traffic Control Tower (ATCT) opened in 2006, and radar and the automated flight data system were added in 2010. The FAA upgraded the radar in the control tower to the STARS system during 2012. An Instrument Landing System (ILS) assists aircraft approaching the runway during inclement weather conditions by providing precision horizontal and vertical guidance. Construction on the ILS was begun in 2007 and, an approach lighting system (MALSF) was built in 2009, to increase the capabilities of the ILS. In 2013, an additional 1,000 feet was added to the existing MALSF lighting system thereby completing the conversion to the more sophisticated MALSF system.

In 2010, the Airport constructed a new terminal building, and terminal apron.

The environmentally-friendly terminal building has been certified LEED gold. The building is designed to provide efficient and functional space for aviation administration and operations personnel, and houses the Airport's mechanical and communication vaults. Nine aviation-related businesses currently have offices in the terminal, and the lease revenues help offset the expenses associated with the building. The lobby and conference room are available for use by airport tenants, businesses, aviation-related groups, neighborhood association groups, as well as City Council, and City departments. The terminal apron expansion added 20 aircraft parking spaces and provides aircraft access to the door of the terminal building.

Construction was completed in November 2012 on the new 4,900 ft. west parallel taxiway, runway drainage improvements, new runway/taxiway signage, and a west lighting equipment vault. The taxiway's construction provides access to the runway from the west side of the Airport which is now available for development.

## APPENDIX A: POPULATION & HOUSING METHODOLOGY

Population growth is calculated from the number of net new dwelling units added to the housing stock. The number of net new dwelling units is derived by subtracting the number of residential units demolished and/ or moved out of the City from the number of residential final inspections completed. Based on where final residential inspections and home demolitions are located, we can estimate not only the growth (or decline) in population, but where these changes are happening within the City.

A population multiplier, based on occupancy and average household size for the City of Arlington, is then applied to the number of net new dwelling units to arrive at the number of new residents. The occupancy rates and average household sizes came from estimates from the North Central Texas Council of Governments. This year, the Annual Growth Profile was revised back to Census 2010 data, using updated population multipliers.

This estimated population growth is then added (or subtracted) to populations totals from the previous year to derive new population estimates for the City as a whole and each planning sector.

**POPULATION GROWTH =  
OCCUPANCY RATE \* HOUSEHOLD  
SIZE \* NET NEW DWELLING UNITS**

**SINGLE FAMILY OCCUPANCY RATE:  
96.6%**

**MULTI-FAMILY OCCUPANCY RATE:  
83.4%**

**SINGLE FAMILY HOUSEHOLD SIZE:  
2.94**

**MULTI-FAMILY HOUSEHOLD SIZE:  
2.25**

Additionally, the number of housing units based on type have been estimated based on the 2006-2010 American Community Survey (ACS) and the 2010 Census data. These estimated housing units were distributed throughout the City by sector by applying the ratio of single-family, multi-family, and other housing units from the ACS by census tract to the overall number of housing units by block from the 2010 Census.

Housing Units are divided into the following categories:

Single Family: One structure, attached or detached; Duplexes; Townhomes; Condominiums; Manufactured Housing

Multi-Family: Structures with 3 or more rented units

Other: Boats; RVs

## APPENDIX B: HOUSING &amp; POPULATION GROWTH

## GROWTH BY SECTOR

Sector	2012		Demolition		New Housing		2013

## APPENDIX G: ZONING DISTRICT SUMMARY

### RESIDENTIAL ZONING DISTRICTS

#### “E” ESTATE:

Single family detached dwellings on minimum 10,000 square foot lots. Specific Use Permit required for day care; bed and breakfast inn.

#### “R” RESIDENTIAL:

All non-residential uses as permitted in “E” plus: Single family detached dwelling on minimum 7,200 square foot lots.

#### “R1” RESIDENTIAL:

All uses permitted in “R” plus: Single family detached dwellings on minimum 6,000 square foot lots.

#### “R2” RESIDENTIAL:

All uses permitted in “R1” plus: Single family detached dwelling on minimum 5,000 square foot lots.

#### “TH” TOWNHOUSE:

All non-residential uses permitted in “E” plus: Townhouses (attached single family) on minimum 3,600 square foot lots.

#### “D” DUPLEX:

Duplex dwellings on minimum 6,000 square foot lots; townhouses allowed. Specific Use Permit required for day care and bed and breakfast inn.

#### “MF14” MEDIUM DENSITY MULTI-FAMILY:

All uses permitted in “D” plus: Apartments at 14 dwelling units per acre; day care; women’s shelter; supervised living facility. Specific Use Permit required for cemetery; nursing home; museum or art gallery.

#### “MF18” MEDIUM DENSITY MULTI-FAMILY:

All uses permitted in “MF14” plus: Apartments at 18 dwelling units per acre.

#### “MF22” MEDIUM DENSITY MULTI-FAMILY:

All uses permitted in “MF14” plus: Apartments at 22 dwelling units per acre.

### NON-RESIDENTIAL ZONING DISTRICTS

#### “O” OFFICE SERVICE:

Offices; museum or art gallery; day care; women’s shelter; crop production. Specific Use Permit required for cemetery; bed and breakfast inn; college, university, or seminary.

#### “NS” NEIGHBORHOOD SERVICE:

All uses permitted in “O” plus: dry cleaning and laundry service; rental store; restaurant; auto parts and accessory sales; alcohol sales; general retail store. Specific Use Permit required for electric utility substation.

#### “LS” LOCAL SERVICE:

All uses permitted in “NS” (except cemetery; women’s shelter; crop production; college, university, or seminary; electric utility substation) plus: bed and breakfast inn, second hand goods; gasoline sales; sidewalk café.

#### “CS” COMMUNITY SERVICE:

All uses permitted in “LS” (except for bed and breakfast inn) plus: cemetery; women’s shelter; nursing home; supervised living facility; crop production; full service hotel; retail gun sales; large scale retail; auto service; car wash; vehicle rental; tattoo parlor; specialty paraphernalia; bail bond service; college, university, or seminary; mortuary or funeral chapel; hospital; electric utility substation. Specific Use Permit required for night club; limited service hotel; residence hotel; indoor gun range; commercial parking; mini-warehouse; halfway house; psychiatric hospital.

#### “B” BUSINESS:

All uses permitted in “CS” (except sidewalk café; large scale retail [requires SUP]) plus: night club; pawn shop; minor auto repair; motor vehicle sales; commercial parking; mini-warehouse; warehouse.

#### “LI” LIGHT INDUSTRIAL:

All uses permitted in “B” (except nursing home; supervised living facility; day care; psychiatric hospital) plus: light manufacturing; bar; sexually oriented business; indoor gun range; major auto repair garage; commercial stables. Specific Use Permit required for: day care.

#### “IM” INDUSTRIAL MANUFACTURING:

All uses permitted in “LI” (except hospital) plus: heavy manufacturing. Specific Use Permit required for prison; high impact use.

### SPECIAL PURPOSE ZONING DISTRICTS

#### “A” AGRICULTURE:

Private stables and single family dwellings on minimum 5-acre lots. Specific Use Permit required for day care.

#### “MU” MIXED USE:

Established to provide areas in which a variety of housing types exists among neighborhood-serving commercial and institutional uses. The intent is to establish architectural character and to encourage pedestrian-oriented activities in key locations of Arlington and to encourage redevelopment in those areas deemed appropriate.

**“MH” MANUFACTURED HOME:**

Manufactured home parks and subdivisions with incidental uses. Minimum 10-acre sites.

**“PD” PLANNED DEVELOPMENT:**

Any residential or non-residential uses allowed within the City shall be permitted under this zoning. Specific permitted uses for each “PD” will be determined at the time the district is approved.

**“DB” DOWNTOWN BUSINESS:**

Auto parts and accessory sales and service; gasoline sales; commercial parking; college, university, or seminary; day care; hospital; mortuary or funeral chapel; offices; night club; bed and breakfast inn; full service hotel; multi-family at maximum 32 dwelling units per acre with conditions; alcohol sales; bar; cleaning laundry; museum or art gallery; rental store; restaurant; second hand goods store; electric utility substation. Specific Use Permit required for limited service hotel; residence hotel; supervised living facility; townhouse; farmers market; bail bond service; minor auto repair; motor vehicle sales and rental.

**“F” FESTIVAL:**

Recreation and/or entertainment facilities including: car wash; gasoline sales; commercial parking; daycare; offices; full service hotel; alcohol sales; cleaning laundry; museum or art gallery; rental store (indoor); restaurant.; electric utility substation. Specific Use Permit required for night club; bed and breakfast inn; duplex; limited service hotel; multi-family; residence hotel; single family; townhouse; farmers market; motor vehicle sales; mini-warehouse.

**ZONING DISTRICT OVERLAYS:****“BP” BUSINESS PARK OVERLAY:**

Special use and development standards are applied in this district to promote high-quality, highintensity, mixed-use development in close proximity to controlled access freeways and other appropriate locations throughout the City.

**“DN” DOWNTOWN NEIGHBORHOOD OVERLAY:**

This area was established to aid in the revitalization of the transition area surrounding the Downtown Business (DB) area. Special use and development standards are applied in this district to promote a mixture of uses in a high quality, high density, pedestrian-oriented setting.

**“AP” AIRPORT OVERLAY:**

Special use and development regulations are applied to those properties which are impacted by the noise and flight patterns around Arlington Municipal Airport.

**“LP” LANDMARK PRESERVATION OVERLAY:**

Intended to protect and preserve those buildings, structure sites, and areas of historical or cultural importance.

**“LCMU” LAMAR/COLLINS MIXED USE OVERLAY:**

Special use and development standards are applied in this district to promote high-quality, high-density, mixed-use development in a specific north Arlington location.

**“ED” ENTERTAINMENT DISTRICT OVERLAY:**

The Entertainment District Overlay is intended to provide a more sustainable mix of uses and activities, while promoting high quality development and an aesthetically pleasing environment in an area including two major sports venues, Six Flags and Hurricane Harbor.

**“VG” VILLAGE ON THE GREEN AT TIERRA VERDE OVERLAY:**

Established to provide an area which will be a financially and environmentally sustainable community memorable for its rural character, villagelike atmosphere, mix of high quality housing options and complementary commercial activity.

**“CD” CONSERVATION DISTRICT OVERLAY:**

Intended to protect and strengthen desirable and unique physical features, design characteristics, and recognized identity and charm of existing neighborhoods.
