### *Finance*

**Auction Income**

**Responsible Department: Finance**

The City receives income from miscellaneous auctions. Items auctioned include surplus City property, vehicles that have reached the end of their specified lifecycles, and stolen property recovered by the Police Department that has not been claimed.

Auctions are overseen by the Purchasing Division in accordance with established property disposal guidelines. Monies received from auctioned items are apportioned to the various funds from which the original purchases were made. The revenue histories reflected below are those accrued to the General Fund.

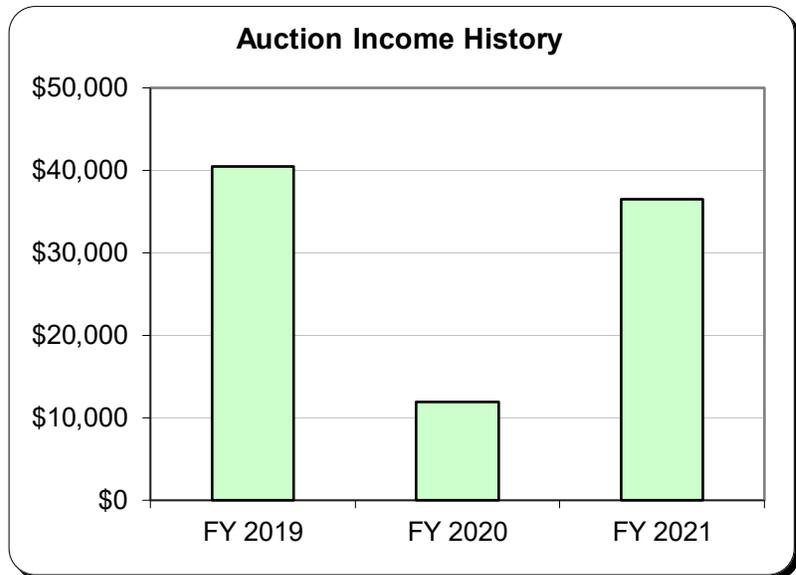

**Revenue Code:**

## *General Fund Revenues*

**Property Taxes (Ad Valorem Taxes)**

**Responsible Department: Finance**

Property taxes are assessed on real estate and personal property as of January 1 each year. The taxes provide funding for general government operations and debt requirements. The basis for the assessment is the value of the property. Taxes are billed on October 1 and the delinquency date is February 1 of the year following the levy. **Current taxes** are those that are paid prior to the delinquency date. **Delinquent taxes**, along with **penalties and interest**, are incurred on taxes paid on or after the delinquency date.

The total property tax rate is split between the General Fund and Debt Service Fund. Debt service requirements are satisfied first, with the rest going to operation and maintenance (O&M) in the General Fund. The maximum property tax rate in Texas is \$2.50 per \$100 value, but there are certain restrictions associated with tax increases.

Exemptions are authorized for homesteads owned by citizens 65 and over, and for fully and permanently disabled persons. Disabled American Veterans may also claim exemptions. A general homestead exemption amounting to 20% of the assessed value has been authorized by the City Council.

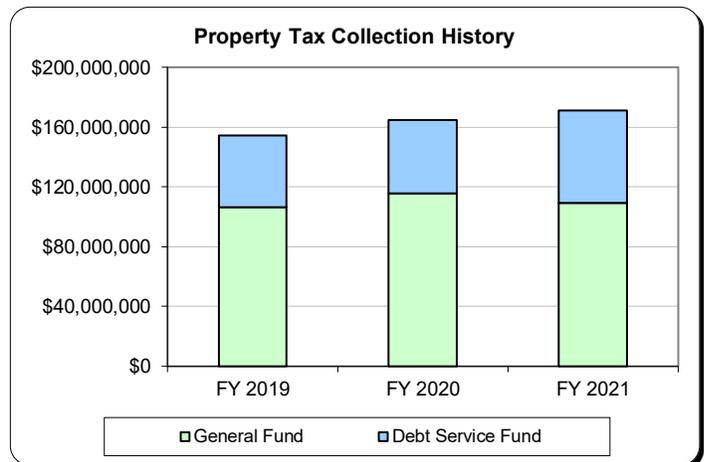

**Revenue Codes:**

- 1000-40001 - General Fund, Current Taxes
- 1000-40002 - General Fund, Delinquent Taxes
- 1000-40003 - General Fund, Penalties and Interest

### Sewer Surcharges

#### Responsible Department: Water Utilities

These monthly surcharges are assessed for any wastewater customer discharging abnormal wastewater or industrial waste, in addition to their regular monthly wastewater service charges. The computations of surcharges are based on the following formula: **Ci = (so) (is) + (bo) (Bi)**

- Ci = surcharge to industrial users in dollars to be added to monthly bills for water and wastewater service.
- so = unit cost of treatment (including sludge treatment) chargeable to suspended solids.
- bo = unit cost of treatment chargeable to BOD.
- bi = amount of BOD from industrial users, lb./month in excess of normal allowable limits.
- is = amount of suspended solids from industrial users, lb./month in excess of normal allowable limits.

The rate for each user may be re-calculated once every 12 months or as necessary to accurately reflect the operations of the user. Customers in the Class Rate System of charges are billed using a separate formula and are exempt from this fee.

The enabling legislation is the federal Clean Water Act of 1976, the City Code’s Industrial Waste and Water Pollution Control Chapter, Section 5.05, Ordinance 03-045 and Resolution 19-252.
